## INTELLECTUAL PROPERTY OWNERSHIP

This documentation is furnished for informational use only and is subject to change without notice. VMware, Inc., assumes no responsibility or liability for any errors or inaccuracies that may appear in this documentation.

This documentation, or any part of it, may not be reproduced, displayed, photocopied, transmitted, or otherwise copied in any form or by any means now known or later developed, such as electronic, optical, or mechanical means, without express written authorization from VMware, Inc.

Warning: This computer program and its documentation are protected by copyright law and international treaties. Any unauthorized copying or distribution of this program, its documentation, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted under the maximum extent possible under the law.

The software installed in accordance with this documentation is copyrighted and licensed by VMware, Inc. under separate license agreement. This software may only be used pursuant to the terms and conditions of such license agreement. Any other use may be a violation of law.

Use, duplication, or disclosure by the Government is subject to restrictions set forth in the Commercial Software - Restricted Rights clause at 52.227-19 of the Federal Acquisitions Regulations (48 CFR 52.227-19) except that the government agency shall not have the right to disclose this software to support service contractors or their subcontractors without the prior written consent of VMware, Inc.

This software is provided by VMware, Inc. and contributors "as is" and any expressed or implied warranties, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose are disclaimed. In no event shall VMware, Inc. or any contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement of substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of this software, even if advised of the possibility of such damage.

## COPYRIGHTS

This software product, its documentation, and its user interface © 1986-2012 VMware, Inc., and GemStone Systems, Inc. All rights reserved by VMware, Inc.

## PATENTS

GemStone software is covered by U.S. Patent Number 6,256,637 "Transactional virtual machine architecture", Patent Number 6,360,219 "Object queues with concurrent updating", Patent Number 6,567,905 "Generational garbage collector with persistent object cache", and Patent Number 6,681,226 "Selective pessimistic locking for a concurrently updateable database". GemStone software may also be covered by one or more pending United States patent applications.

## TRADEMARKS

**VMware** is a registered trademark or trademark of VMware, Inc. in the United States and/or other jurisdictions.

**GemStone**, **GemBuilder**, **GemConnect**, and the GemStone logos are trademarks or registered trademarks of VMware, Inc., previously of GemStone Systems, Inc., in the United States and other countries.

**UNIX** is a registered trademark of The Open Group in the United States and other countries.

**Sun**, **Sun Microsystems**, and **Solaris** are trademarks or registered trademarks of Oracle and/or its affiliates. **SPARC** is a registered trademark of SPARC International, Inc.

**HP**, **HP Integrity**, and **HP-UX** are registered trademarks of Hewlett Packard Company.

**Intel**, **Pentium**, and **Itanium** are registered trademarks of Intel Corporation in the United States and other countries.

**Microsoft**, **MS**, **Windows**, **Windows XP**, **Windows 2003**, **Windows 7** and **Windows Vista** are registered trademarks of Microsoft Corporation in the United States and other countries.

**Linux** is a registered trademark of Linus Torvalds and others.

**Red Hat** and all Red Hat-based trademarks and logos are trademarks or registered trademarks of Red Hat, Inc. in the United States and other countries.

**SUSE** is a registered trademark of Novell, Inc. in the United States and other countries.

**AIX**, **POWER5**, and **POWER6** are trademarks or registered trademarks of International Business Machines Corporation.

**Apple**, **Mac**, **Mac OS**, **Macintosh**, and **Snow Leopard** are trademarks of Apple Inc., in the United States and other countries.

Other company or product names mentioned herein may be trademarks or registered trademarks of their respective owners. Trademark specifications are subject to change without notice. VMware cannot attest to the accuracy of all trademark information. Use of a term in this documentation should not be regarded as affecting the validity of any trademark or service mark.

## *Preface*

### **About This Documentation**

These release notes describe changes in the GemStone/S 64 Bit™ version 2.4.5.1 release. Read these release notes carefully before you begin installation, conversion testing, or development with this release.

No separate Installation Guide is provided with this release. For instructions on installing GemStone/S 64 Bit version 2.4.5.1, or upgrading or converting from previous products or versions, see the Installation Guide for version 2.4.5.

These documents are also available on the GemStone customer website, as described below.

### **Terminology Conventions**

The term “GemStone” is used to refer to the server products GemStone/S 64 Bit and GemStone/S; the GemStone Smalltalk programming language; and may also be used to refer to the company, previously GemStone Systems, Inc., now a division of VMware, Inc.

No separate Installation Guide is provided with this release. For instructions on installing GemStone/S 64 Bit version 2.4.5.1, or upgrading or converting from previous products or versions, see the Installation Guide for version 2.4.5. These documents are also available on the GemStone customer website, as described below.

### **Technical Support**

#### **GemStone Website**

**<http://support.gemstone.com>**

GemStone’s Technical Support website provides a variety of resources to help you use GemStone products:

- ▶ **Documentation** for released versions of all GemStone products, in PDF form.
- ▶ **Downloads and Patches**, including versions of GemBuilder for Smalltalk.
- ▶ **Bugnotes**, identifying performance issues or error conditions that you may encounter when using a GemStone product.
- ▶ **TechTips**, providing information and instructions that are not in the documentation.
- ▶ **Compatibility matrices**, listing supported platforms for GemStone product versions.

This material is updated regularly; we recommend checking this site on a regular basis.

## Help Requests

You may need to contact Technical Support directly, if your questions are not answered in the documentation or by other material on the Technical Support site. Technical Support is available to customers with current support contracts.

Requests for technical assistance may be submitted online, by email, or by telephone. We recommend you use telephone contact only for more serious requests that require immediate evaluation, such as a production system down. The support website is the preferred way to contact Technical Support.

**Website:** <http://techsupport.gemstone.com>

**Email:** [techsupport@gemstone.com](mailto:techsupport@gemstone.com)

**Telephone:** (800) 243-4772 or (503) 533-3503

When submitting a request, please include the following information:

- ▶ Your name, company name, and GemStone server license number.
- ▶ The versions of all related GemStone products, and of any other related products, such as client Smalltalk products.
- ▶ The operating system and version you are using.
- ▶ A description of the problem or request.
- ▶ Exact error message(s) received, if any, including log files if appropriate.

Technical Support is available from 8am to 5pm Pacific Time, Monday through Friday, excluding GemStone holidays.

## 24x7 Emergency Technical Support

GemStone offers, at an additional charge, 24x7 emergency technical support. This support entitles customers to contact us 24 hours a day, 7 days a week, 365 days a year, for issues impacting a production system. For more details, contact your GemStone account manager.

## Training and Consulting

Consulting is available to help you succeed with GemStone products. Training for GemStone software is available at your location, and training courses are offered periodically at our offices in Beaverton, Oregon. Contact your GemStone account representative for more details or to obtain consulting services.

***Chapter 1. GemStone/S 64 Bit 2.4.5.1 Release Notes***

<b><i>Overview</i></b>	<b>7</b>
<b><i>Supported Platforms and GBS Versions</i></b>	<b>7</b>
Platforms . . . . .	7
GBS version summary . . . . .	8
<b><i>Changes in this release</i></b>	<b>9</b>

Memory leak in tranlog restore . . . . .	9
Scopes overflow error . . . . .	9
Risk of bad tranlog record written with nonzero STN_GEM_TIMEOUT . . . . .	9
Commit Record Backlog during restore . . . . .	9
Failure in pregrow of dynamically added extent causes extent corruption . . . . .	9
Allow %Z timezone specifier in GS_CFTIME and enforce format . . . . .	9

### **Overview**

GemStone/S 64 Bit 2.4.5.1 is a new version of the GemStone/S 64 Bit object server, with fixes for a number of bugs, including critical bugs, and containing C-level memory barrier additions that address issues with AIX on POWER7. These issues technically also could affect Solaris on SPARC and HP-UX, but have no effect on operating systems running on Intel.

We recommend everyone using GemStone/S 64 Bit 2.x upgrade to this new version.

These release notes provide changes between the previous version of GemStone/S 64 Bit, version 2.4.5, and version 2.4.5.1. If you are upgrading from a version prior to 2.4.5, please also review the release notes for each intermediate release to see the full set of changes.

No separate Installation Guide is provided with this release. For installation instructions, use the Installation Guide for version 2.4.5.

### **Supported Platforms and GBS Versions**

#### **Platforms**

GemStone/S 64 Bit version 2.4.5.1 is supported on the following platforms:

- ▶ Solaris 9 and 10 on SPARC
- ▶ Solaris 10 on x86
- ▶ HP-UX 11.11 and 11.31 on PA-RISC
- ▶ AIX 5.3, 6.1, and 7.1
- ▶ SuSE Linux ES 10 and 11, and Red Hat Linux ES 5.0, 5.5, and 6.1

For more information and detailed requirements for each supported platform, please refer to the GemStone/S 64 Bit v2.4.5 Installation Guide for that platform.

## GBS version summary

The following versions of GBS are supported with GemStone/S 64 Bit version 2.4.5.1.

### GBS version 7.4.1

<b>VW 7.8.1 32-bit</b>	<b>VW 7.8.1 64-bit</b>	<b>VW 7.8 32-bit</b>	<b>VW 7.8 64-bit</b>	<b>VW 7.7.1 32-bit</b>	<b>VW 7.7.1 64-bit</b>
<ul style="list-style-type: none"> <li>▶ Windows XP and Windows 7</li> <li>▶ Solaris 9 and 10 on SPARC</li> <li>▶ SuSE Linux ES 10 and 11; Red Hat Linux ES 5.5 and 6.1</li> </ul>	<ul style="list-style-type: none"> <li>▶ Solaris 10 on SPARC</li> <li>▶ SuSE Linux ES 10 and 11; Red Hat Linux ES 5.5 and 6.1</li> </ul>	<ul style="list-style-type: none"> <li>▶ Windows XP and Windows 7</li> <li>▶ Solaris 9 and 10 on SPARC</li> <li>▶ SuSE Linux ES 10 and 11; Red Hat Linux ES 5.5 and 6.1</li> </ul>	<ul style="list-style-type: none"> <li>▶ Solaris 10 on SPARC</li> <li>▶ SuSE Linux ES 10 and 11; Red Hat Linux ES 5.5 and 6.1</li> </ul>	<ul style="list-style-type: none"> <li>▶ Windows XP and Windows 7</li> <li>▶ Solaris 9 and 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>	<ul style="list-style-type: none"> <li>▶ Solaris 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>

### GBS version 7.3.3

<b>VW 7.7.1 32-bit</b>	<b>VW 7.7.1 64-bit</b>	<b>VW 7.7 32-bit</b>	<b>VW 7.7 64-bit</b>
<ul style="list-style-type: none"> <li>▶ Windows XP and Windows 7</li> <li>▶ Solaris 9 and 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>	<ul style="list-style-type: none"> <li>▶ Solaris 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>	<ul style="list-style-type: none"> <li>▶ Windows XP and Windows 7</li> <li>▶ Solaris 9 and 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>	<ul style="list-style-type: none"> <li>▶ Solaris 10 on SPARC</li> <li>▶ SuSE Linux ES 10, Red Hat Linux ES 5.0 and 5.5</li> </ul>

### GBS version 5.3.2

<b>VA Smalltalk 8.0.2</b>	<b>VA Smalltalk 7.5.2</b>
<ul style="list-style-type: none"> <li>▶ Windows XP, Windows 7, and Windows 2008 R2</li> </ul>	<ul style="list-style-type: none"> <li>▶ Windows XP</li> </ul>

For more details on supported platforms and requirements, see the Release Notes for that version of GemBuilder for Smalltalk.

## Changes in this release

### Support for AIX on POWER7

The POWER7 chip provides more aggressive prefetch of data and instructions. This required additional memory barriers on atomic updates within GemStone, to avoid the risk of coherency and audit problems.

Previous versions of GemStone/S 64 Bit were not certified on POWER7. These earlier versions could encounter cache coherency and corruption problems when running with production loads on POWER7 systems. (#42089)

### Memory leak in tranlog restore

During transaction log restore operations, there was a memory leak of variable size. This memory leak was primarily an issue for warm backups, which repeatedly perform tranlog restores; the stone would eventually run out of memory and shut down. (#42141)

### Scopes overflow error

When handling an exception, it was possible to encounter a fatal error "VM temporary object scopes overflow " (#42105)

### Risk of bad tranlog record written with nonzero STN\_GEM\_TIMEOUT

The way transaction log records are generated when there is a gem terminated due to STN\_GEM\_TIMEOUT created a risk of writing a bad record to the tranlog. This is not visible when writing the tranlog, but when the transaction log containing this record is replayed, including during recovery after a shutdown, it fails with the error "unhandled recordKind". (#42114)

### Commit Record Backlog during restore

When restoring transaction logs containing a large amount of reclaim, it was possible for a commit record backlog to develop. This could use up all available free space and cause the restore to fail. (#42125)

### Failure in pregrow of dynamically added extent causes extent corruption

When an extent is added dynamically using methods such as createExtent:withMaxSize:, the new extent is pregrown if DBF\_PRE\_GROW is true. If the operation fails, for example if the specified size is larger than available disk, the system does not clean up properly, and it can result in the wrong information written to the root page. (#42147)

### Allow %Z timezone specifier in GS\_CFTIME and enforce format

GemStone allows you to customize the way timestamps are printed in log files using the GS\_CFTIME environment variable. This previously always embedded the timezone, so including the %Z specifier within the GS\_CFTIME resulted in the timezone included twice. (#41857)

In addition, logic has been added to verify that the GS\_CFTIME contains sufficient information for debugging of log files following incidents. \$GS\_CFTIME must be a valid strftime format string containing fields for the month, day, hour, minute and seconds. If the setting does not meet these restrictions, default formatting is used.
