## INTELLECTUAL PROPERTY OWNERSHIP

This documentation is furnished for informational use only and is subject to change without notice. GemTalk Systems LLC assumes no responsibility or liability for any errors or inaccuracies that may appear in this documentation.

This documentation, or any part of it, may not be reproduced, displayed, photocopied, transmitted, or otherwise copied in any form or by any means now known or later developed, such as electronic, optical, or mechanical means, without express written authorization from GemTalk Systems.

Warning: This computer program and its documentation are protected by copyright law and international treaties. Any unauthorized copying or distribution of this program, its documentation, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted under the maximum extent possible under the law.

The software installed in accordance with this documentation is copyrighted and licensed by GemTalk Systems under separate license agreement. This software may only be used pursuant to the terms and conditions of such license agreement. Any other use may be a violation of law.

Use, duplication, or disclosure by the Government is subject to restrictions set forth in the Commercial Software - Restricted Rights clause at 52.227-19 of the Federal Acquisitions Regulations (48 CFR 52.227-19) except that the government agency shall not have the right to disclose this software to support service contractors or their subcontractors without the prior written consent of GemTalk Systems.

This software is provided by GemTalk Systems LLC and contributors "as is" and any expressed or implied warranties, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose are disclaimed. In no event shall GemTalk Systems LLC or any contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement of substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use of this software, even if advised of the possibility of such damage.

## COPYRIGHTS

This software product, its documentation, and its user interface © 1986-2016 GemTalk Systems LLC. All rights reserved by GemTalk Systems.

## PATENTS

GemStone software is covered by U.S. Patent Number 6,256,637 "Transactional virtual machine architecture", Patent Number 6,360,219 "Object queues with concurrent updating", Patent Number 6,567,905 "Generational garbage collector with persistent object cache", and Patent Number 6,681,226 "Selective pessimistic locking for a concurrently updateable database". GemStone software may also be covered by one or more pending United States patent applications.

## TRADEMARKS

**GemTalk**, **GemStone**, **GemBuilder**, **GemConnect**, and the GemStone and GemTalk logos are trademarks or registered trademarks of GemTalk Systems LLC, or of VMware, Inc., previously of GemStone Systems, Inc., in the United States and other countries.

**VMware** is a registered trademark or trademark of VMware, Inc. in the United States and/or other jurisdictions.

**UNIX** is a registered trademark of The Open Group in the United States and other countries.

**Sun**, **Sun Microsystems**, and **Solaris** are trademarks or registered trademarks of Oracle and/or its affiliates. **SPARC** is a registered trademark of SPARC International, Inc.

**Intel**, **Pentium**, and **Itanium** are registered trademarks of Intel Corporation in the United States and other countries.

**Microsoft**, **MS**, **Windows**, **Windows 7**, **Windows 2008**, and **Windows 8** are registered trademarks of Microsoft Corporation in the United States and other countries.

**Linux** is a registered trademark of Linus Torvalds and others.

**Red Hat** and all Red Hat-based trademarks and logos are trademarks or registered trademarks of Red Hat, Inc. in the United States and other countries.

**Ubuntu** is a registered trademark of Canonical Ltd., Inc., in the U.S. and other countries.

**SUSE** is a registered trademark of Novell, Inc. in the United States and other countries.

**AIX**, **POWER5**, **POWER6**, and **POWER7** are trademarks or registered trademarks of International Business Machines Corporation.

**Apple**, **Mac**, **Mac OS**, and **Macintosh** are trademarks of Apple Inc., in the United States and other countries.

Other company or product names mentioned herein may be trademarks or registered trademarks of their respective owners. Trademark specifications are subject to change without notice. GemTalk Systems cannot attest to the accuracy of all trademark information. Use of a term in this documentation should not be regarded as affecting the validity of any trademark or service mark.

# Preface

---

## About This Documentation

These Release Notes describe the changes in the GemBuilder® for Smalltalk version 8.2 release.

For information on installing or upgrading to this version of GemBuilder for Smalltalk, please refer to the *GemBuilder for Smalltalk Installation Guide* for version 8.2.

This documentation is also available on the GemStone Technical Support website.

## Terminology Conventions

The term “GemStone” is used to refer to the server products GemStone/S 64 Bit and GemStone/S, and the GemStone family of products; the GemStone Smalltalk programming language; and may also be used to refer to the company, now GemTalk Systems LLC, previously GemStone Systems, Inc. and a division of VMware, Inc.

## Technical Support

### Support Website

#### **[gemtalksystems.com](http://gemtalksystems.com)**

GemTalk’s website provides a variety of resources to help you use GemTalk products:

- ▶ **Documentation** for the current and for previous released versions of all GemTalk products, in PDF form.
- ▶ **Product download** for the current and selected recent versions of GemTalk software.
- ▶ **Bugnotes**, identifying performance issues or error conditions that you may encounter when using a GemTalk product.

- ▶ **TechTips**, providing information and instructions that are not in the documentation.
- ▶ **Compatibility matrices**, listing supported platforms for GemTalk product versions.

This material is updated regularly; we recommend checking this site on a regular basis.

## Help Requests

You may need to contact Technical Support directly, if your questions are not answered in the documentation or by other material on the Technical Support site. Technical Support is available to customers with current support contracts.

Requests for technical assistance may be submitted online, by email, or by telephone. We recommend you use telephone contact only for more serious requests that require immediate evaluation, such as a production system down. The support website is the preferred way to contact Technical Support.

**Website:** [techsupport.gemtalksystems.com](http://techsupport.gemtalksystems.com)

**Email:** [techsupport@gemtalksystems.com](mailto:techsupport@gemtalksystems.com)

**Telephone:** (800) 243-4772 or (503) 766-4702

When submitting a request, please include the following information:

- ▶ Your name and company name.
- ▶ The version of GemBuilder for Smalltalk, client Smalltalk product and version, and versions of all related GemTalk products and other products.
- ▶ The operating system and version you are using.
- ▶ A description of the problem or request.
- ▶ Exact error message(s) received, if any, including log files if appropriate.

Technical Support is available from 8am to 5pm Pacific Time, Monday through Friday, excluding GemTalk holidays.

## 24x7 Emergency Technical Support

GemTalk offers, at an additional charge, 24x7 emergency technical support. This support entitles customers to contact us 24 hours a day, 7 days a week, 365 days a year, for issues impacting a production system. For more details, contact GemTalk Support Renewals.

## Training and Consulting

GemTalk Professional Services provide consulting to help you succeed with GemStone products. Training for GemStone/S is available at your location, and training courses are offered periodically at our offices in Beaverton, Oregon. Contact GemTalk Professional Services for more details or to obtain consulting services.

# Release Notes for GemBuilder for Smalltalk 8.2

---

GemBuilder for Smalltalk (GBS) version 8.2 is a new version of the GemBuilder for Smalltalk product, adding support for VisualWorks 8.x and fixing a number of bugs. Please take time to read through these release notes before installing or upgrading, to acquaint yourself with the changes.

These release notes provide changes between the previous version of GBS, version 8.1, and version 8.2. If you are upgrading from a version prior to 8.1, you should also review the release notes for each intermediate release between your version and v8.2, to see the full set of changes. In particular, the replication infrastructure changed in v8.x, so you should carefully review any use of private GBS protocol.

This release supports VisualWorks Smalltalk only, and cannot be used with VA Smalltalk. VA Smalltalk is supported by a separate set of GBS releases.

To install GemBuilder for Smalltalk 8.2, follow the instructions in the *GemBuilder for Smalltalk Installation Guide* for version 8.2.

## Supported Platforms and Versions

The following tables describe the client Smalltalk versions and platforms supported by GBS 8.2, and the certified GemStone server product shared library versions with each.

For more details, including the specific required client libraries for each server product and versions, refer to the *GemBuilder for Smalltalk Installation Guide* for version 8.2.

**Table 1 Supported GemStone/S 64 Bit Server versions**

	<b>VW 8.1.1 32-bit (RPC only) and 64-bit (RPC, and linked on UNIX)</b>	<b>VW 7.10.1 32-bit (RPC only) and 64-bit (RPC, and linked on UNIX)</b>
<b>Windows 8</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Windows 2008 R2</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Windows 7</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Ubuntu Linux 12.04</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Ubuntu Linux 14.04</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Red Hat Linux ES 6.4</b>	3.2.15	3.2.15
<b>Red Hat Linux ES 6.5</b>	3.2.15	3.2.15
<b>Red Hat Linux ES 6.7</b>	3.3.1	3.3.1
<b>Red Hat Linux ES 7.1</b>	3.3.1	3.3.1
<b>SUSE Linux ES 12</b>	3.3.1, 3.2.15	3.3.1, 3.2.15
<b>Solaris 10 on SPARC</b>	3.3.1, 3.2.15	3.3.1, 3.2.15

## Changes in this Release

### Support for VisualWorks 8.x

VisualWorks 8.0 introduced significant changes affecting the User Interface, requiring many changes in the GBS tools that modify the base VisualWorks tools, such as browsers and the debugger.

GBS v8.2 supports both 8.x and 7.x versions of VisualWorks, but the underlying GBS code for each has differences. There may be subtle differences in behavior in cases where GBS relies on the underlying VisualWorks functionality.

Visible changes include:

- ❑ Methods and GS Methods tabs not present with VW 8.1.1

The base inspectors in VisualWorks 7.x included both Basic and Methods tabs, but in VisualWorks 8.1.1, only include a Basic button. For consistency, when using GBS 8.2 with VisualWorks 8.x, the GS Methods option is omitted.

The **Object > browse** menu item provides the method information.

- ❑ Workspace Smalltalk menu not present with VW 8.1.1

The menu items previously under the Smalltalk Menu are now under the **Edit** menu. Specifics of the menu items and the popup menus also have minor differences between 8.2 under 8.1.1 and 7.10.1.

### Change in Distribution

The GBS Distribution now includes an extra set of parcel files that are specific to either VisualWorks 7.x or VisualWorks 8.x. These files are `GbsToolsVw7.pcl` and `.pst`, and `GbsToolsVw8.pcl` and `.pst`.

The process of loading the GbsTools parcel automatically detects your VisualWorks version and loads the correct version-specific parcel.

## Bugs Fixed

The following bugs in version 8.1 are fixed in version 8.2:

### Some methods modified the client map without write protect

The method `GbxDelegate>>asForwarder`, and several private GBS methods, sent `#unprotectedConnectNewClient:toServer:` without acquiring the client map's `writeProtect` semaphore. (#46296)

### Client map in 64-bit clients may have been corrupted by delete

On 64-bit VisualWorks clients, deletions from the client map that involve a collision chain that wraps around the end of the table may not be handled correctly, corrupting the table. (#46334)

This does not affect clients on 32-bit VisualWorks.

### Client map auditHashing does not detect some kinds of corruption

Auditing the client map using `auditHashing` did not detect errors in cases where the hash collision chain wraps around the end of the table. (#46333)

### Stuck semaphores due to race condition in process termination

There was a small window for a race condition with respect to process termination. If a process is terminated during this small window, the semaphore was not signaled, and the protected resource became unavailable to any process, leaving the semaphore stuck. (#46327)

### Code formatting failed with server curly braces syntax

The GemStone/S server uses curly braces `{}` for Array constructors and for indexed query selection blocks. The VW code formatter did not understand this syntax. (#42784)
